

SKELETAL SYSTEM – WORKSHEET # 3

1. Locate and identify the parts of the clavicle:

Parts of the Clavicle

Parts of the Clavicle	Description / Location
Acromion articular facet	
Sternal articular facet	

2. Locate and identify the parts of the scapula:

Parts of the Scapula

Parts of the Scapula	Description / Location
Acromion process	
Coracoid Process	
Glenoid fossa	
Spine of scapula	
Supraspinous fossa	
Infraspinous fossa	
Scapular notch	

3. What is the joint where the humerus meets the scapula?

4. Identify and locate the structures of the humerus:

Parts of the Humerus

Parts of the humerus	Description / Location
Head	
Greater tubercle	
Lesser tubercle	
Trochlea (Trochlear notch)	
Olecranon fossa	
Capitulum	

5. Locate and identify the parts of the ulna:

Parts of the Ulna

Parts of the Ulna	Location / Description
Olecranon process	
Styloid process	
Coronoid process	

6. What kind of joint is formed where the ulna meets the humerus?

7. Locate and identify the parts of the radius:

Parts of the Radius

Parts of the radius	Description / Location
Head	
Radial tuberosity	
Styloid process	

8. What kind of joint is formed where the radius meets the ulna?

9. Locate the carpal bones of the wrist. How many are there?

10. Locate the metacarpal bones of the wrist. How many are there? How are they named?

11. Locate the phalanges of the hand. How many are there?

12. What kind of joint is formed between the following?

Location of Joint	Type of Joint
Carpal meets carpal	
Carpal meets metacarpal	
Phalanges meet metacarpal	
Phalanges meet phalanges	
Metacarpal 1 meets trapezium	

13. What is the "pollex" on the cat?
